

# Ensono's Fast-Track to Cyber Risk Clarity

## Industry:

Cloud Services Provider

## Environment:

2,800 Employees

## Locations:

9

## Customers:

Over 230 Worldwide

## Conclusion:

By adopting ArxNimbus' Thrivaca™ platform, Ensono transitioned from a mixed-method risk assessment to a fully data-driven approach. This provided them with clear, actionable insights into their cyber risk exposure in a fraction of the time, underscoring the value of adopting advanced, data-centric risk management solutions. The platform's rapid results and comprehensive risk interrelationship mapping equipped Ensono with the tools to optimize its cybersecurity investments and avoid unnecessary costs in the future.

ArxNimbus

## Situation:

Ensono, a leading cloud services provider, was seeking a more reliable and accurate method of managing its cyber risks. To achieve this, the company hired a consulting firm for \$250,000 to conduct a comprehensive risk assessment. Unfortunately, the final results from the assessment were imbalanced, as they combined both objective and subjective data, leading to an unclear understanding of the company's true cyber risk landscape, despite the cost.

## Solution:

In response, Ensono licensed **ArxNimbus' Thrivaca™ risk management platform** to conduct a more data-driven risk analysis.

The Thrivaca platform leveraged:

- **Scanned data** to identify potential threats in real-time,
- **Audit-supported controls data** to validate existing cybersecurity measures, and
- **Financial reports** to integrate a clear valuation of risk.

## Impact:

The switch to the Thrivaca platform had immediate and significant benefits for Ensono:

- **Rapid Results:** Thrivaca delivered results within days, providing timely insights that the previous consulting effort had struggled to deliver.
- **Actionable Insights:** The platform offered a preferred basis for decision-making, enabling Ensono to understand risk interrelationships and take targeted action.
- **Cost Savings:** An executive sponsor at Ensono noted that had they known about the Thrivaca platform earlier, the company could have potentially saved the \$250,000 spent on the initial consulting effort.

Do you have cyber risk? Everyone does. How much risk - in dollar terms - are you carrying now? How would you know? Implementing specific technology solutions is essential. Is this enough on its own? How can you be sure? What do you stand to gain from a risk-focused strategy? Is it worth finding out? Let us take you through how these results are being attained by other organizations every day, and provide you a complimentary risk analysis in the process. We're here to eliminate cyber risk and help get you to a better place. Book your risk-focus session now - before something happens.
